

L3dgr End User License Agreement

Document ID: L3DGR-EULA-2.1

Version: 2.1

Effective date: May 24, 2026

Last updated: May 24, 2026

IMPORTANT: This End User License Agreement ("EULA") is between you and Fors33 for L3dgr software, including the L3dgr Docker Desktop Extension, binaries, APIs, and documentation. By installing or using L3dgr, you agree to this EULA and the L3dgr Privacy Policy (L3DGR-PRIVACY-2.0). If you do not agree, do not install or use the software.

1. Grant of license

Fors33 grants a revocable, non-exclusive, non-transferable, limited license to install and use L3dgr according to your subscription tier and documentation.

- Evaluation or community tiers: limited features as documented.
- Paid tiers: advanced features, subject to seat limits and license tokens issued to your account.

2. License restrictions

You may not:

- Reverse engineer, decompile, or extract source from compiled binaries except where law permits.
- Share, sublicense, or publish API keys, license tokens, or seat credentials.
- Circumvent license, OAuth, or telemetry controls.
- Use L3dgr to build a directly competing product.

3. Docker Desktop Extension permissions

L3dgr runs inside the Docker Desktop extension virtual machine with privileges comparable to the Docker Desktop user. You acknowledge that L3dgr may:

- Read and write Docker-shared host paths under /host that you select.
- Store state in Docker named volumes under /var/lib/fors33.
- Bind a loopback port (currently 127.0.0.1:8133) for OAuth callbacks and local API access from the extension UI.
- Contact Fors33 services for OAuth, license sync, and optional telemetry when enabled.

Account sign-in is required for paid and account-backed features as documented. Some local workflows may remain available without sign-in where your license tier and settings allow.

4. Disclaimers

L3dgr provides cryptographic, diagnostic, and evidence utilities "AS IS" and "AS AVAILABLE."

Fors33 does not provide legal, financial, or regulatory advice and does not guarantee compliance with any law or regulation. Tools may assist technical integrity reviews; you remain solely responsible for compliance, retention, legal hold, risk management, audits, and counsel review.

L3dgr is not a regulatory certification, SEC filing system, or substitute for a qualified timestamp authority or records repository you approve. In regulated audit modes, you must configure a reachable RFC 3161 timestamp service and remote storage policies your organization accepts.

5. Third-party connectors and remote storage

T3thr connectors and operator-configured remote endpoints (including S3-compatible storage) are under your control. Fors33 is not liable for third-party uptime, rate limits, data loss in transit, or bucket policy errors. You are responsible for credentials, encryption, retention, and provider terms.

6. Data processing summary

See L3DGR-PRIVACY-2.0. Fors33 does not receive raw file contents by default. Optional telemetry is off by default and limited to non-identifying technical fields when enabled.

7. Limitation of liability

To the maximum extent permitted by law, Fors33 is not liable for indirect, incidental, special, consequential, or punitive damages, including regulatory fines, data loss, or business interruption. Fors33's total liability is limited to fees you paid for L3dgr in the twelve months before the claim.

8. Indemnification

You agree to indemnify Fors33 against claims arising from your use, your data, your connector configurations, or your violation of this EULA.

9. Termination

This EULA ends if you breach it or your subscription expires. Stop using the software and destroy local license material. Uninstalling the extension may delete Docker volumes holding local state unless you export identity first.

10. Governing law

Governed by the laws of the jurisdiction in which Fors33 is established, without regard to conflict-of-law principles, except where mandatory consumer law applies.

11. Export compliance

You represent that you are not located in, controlled by, or a resident of embargoed jurisdictions or prohibited party lists, and you will not export or re-export L3dgr in violation of U.S. export laws. See also Section 6 of the Fors33 Acceptable Use Policy (FORS33-AUP-2.0).
