

# Fors33 Intellectual Property Notice

**Last Updated:** March 29, 2026

**1. Absolute Ownership:** All software, infrastructure, APIs, user interfaces, text, graphics, visual interfaces, and underlying methodologies provided by Fors33 (collectively, the "Proprietary Material") are the exclusive property of Fors33. This Proprietary Material is protected by copyright, trademark, patent, and trade secret laws, as well as other intellectual property rights and unfair competition laws of the United States and foreign jurisdictions.

**2. Trademarks and Brand Identity:** The Fors33 name, the split-circle F33 logo, and the names of specific products including L3dgr and T3thr are trademarks of Fors33. You are strictly prohibited from using these marks, or any confusingly similar variations, in connection with any third-party product or service. You may not use our branding to imply affiliation, endorsement, or sponsorship without explicit, written authorization from Fors33.

**3. Software and Code Restrictions:** Your access to our Services does not grant you ownership of our software. You are granted a limited, operational license as defined in our Terms of Service. You may not copy, reproduce, modify, create derivative works from, distribute, publicly display, or attempt to extract the source code or cryptographic logic of any Fors33 application, sidecar generator, or API.

**4. User Data and System Output:** We maintain a strict boundary regarding your local data. You retain all ownership rights to the raw datasets, files, and Docker volumes you process using our tools. Fors33 claims no intellectual property rights over your proprietary information. However, the cryptographic proofs, sidecar formats, and validation outputs generated by our software remain part of the Fors33 operational ecosystem.

**5. Feedback and Contributions:** If you provide Fors33 with any feedback, suggestions, bug reports, or feature requests regarding the Services, you grant us an unrestricted, perpetual, irrevocable, royalty-free right to use, implement, and commercialize that feedback without any obligation or compensation to you.

**6. Copyright Infringement and DMCA:** Fors33 respects the intellectual property rights of others. If you believe that your copyrighted work has been copied or utilized on our platform in a way that constitutes copyright infringement, you must provide our legal team with a written notification containing:

- A physical or electronic signature of the copyright owner or authorized agent.
- Identification of the copyrighted work claimed to have been infringed.
- Identification of the material that is claimed to be infringing and its exact location.
- Your contact information, including email and physical address.
- A statement made under penalty of perjury that the information provided is accurate and that you are authorized to act on behalf of the owner.

**7. Patent and Innovation Rights:** Fors33 engineers systems in data integrity and signal processing. Certain processes, algorithms, architectures, and systems within the Services may be covered by pending provisional applications or issued patents. Your access to the Services does not convey, by implication, estoppel, or otherwise, any license or rights under any such patents or patent applications.

**8. Injunctive Relief:** You acknowledge and agree that any unauthorized use, reverse engineering, reproduction, or distribution of our Proprietary Material will cause immediate and irreparable harm to Fors33, for which monetary damages would be wholly inadequate. Accordingly, Fors33 shall be entitled to seek immediate injunctive or equitable relief in any court of competent jurisdiction to stop such breach, without the necessity of posting a bond, in addition to any other legal remedies available.

**9. Open-Source Components:** The Fors33 software ecosystem may contain, integrate with, or dynamically link to third-party open-source software components. These components are governed by their respective open-source licenses, which are provided in the relevant documentation or software repositories. Nothing in this Notice restricts, limits, or overrides your rights or obligations under those specific open-source licenses.

**10. Publicity and Logo Usage:** By subscribing to the Fors33 software using a corporate domain, you grant Fors33 a non-exclusive, royalty-free right to use your company

name and logo strictly for promotional purposes, such as identifying you as a customer on our website or in marketing materials. You may revoke this permission at any time by contacting our support team in writing.

Send all infringement claims directly to: [legal@fors33.com](mailto:legal@fors33.com).
