

# T3thr Privacy Policy

Document ID: T3THR-PRIVACY-2.0

Version: 2.0

Effective date: May 20, 2026

Last updated: May 20, 2026

IMPORTANT: This Privacy Policy explains how Fors33 handles information when you use T3thr software, including standalone containers and T3thr invoked from the L3dgr Docker Desktop Extension.

## 1. Local-by-default processing

T3thr ingests, parses, and normalizes data in environments you control. By default, Fors33 does not receive raw files, proprietary datasets, or normalized record contents from your pipelines.

## 2. Deployment contexts

### 2.1 Standalone T3thr

When you run T3thr as a standalone container or binary, data remains in paths and volumes you configure unless you enable outbound connectors you control.

### 2.2 T3thr inside L3dgr

When T3thr runs as a child process of the L3dgr Docker Desktop Extension, local access, volumes, OAuth, license sync, optional telemetry, and remote storage practices for the extension are described in the L3dgr Privacy Policy (L3DGR-PRIVACY-2.0). T3thr does not perform sealing, manifest signing, or regulated policy enforcement; those remain in L3dgr.

## 3. Information we may collect on servers

- Account, billing, and license metadata (see Fors33 Privacy Policy FORS33-PRIVACY-2.0).
- When bundled with L3dgr and telemetry is enabled by you in L3dgr Settings, the same minimal technical telemetry fields apply (event, platform, timestamp, status only; default off).
- Website logs when you visit fors33.com.

## 4. Connector traffic

Configured connectors (file, live WebSocket, REST, message bus, gRPC, or custom endpoints) communicate with third-party systems under your configuration. Fors33 does not receive connector secrets in telemetry. Provider terms and security are your responsibility.

## 5. How we use information

License validation, support, fraud prevention, and service improvement. We do not sell personal information.

## 6. Third-party processors

Including Stripe, identity providers, and infrastructure partners.

## **7. Your choices**

Manage marketing opt-out via email links. Cancel subscriptions via the customer portal. For L3dgr extension telemetry, use L3dgr Settings.

## **8. Changes**

Posted at [fors33.com/t3thr/docs](https://fors33.com/t3thr/docs) with updated version numbers.
